

# 2 Day Hands-on Workshop **DATA HANDLING AND STATISTICAL ANALYSIS** for Six Sigma Projects

27 - 28 May 2019, Bengaluru

“Well prepared is half done”. Any problem with complete data or datasets can be resolved with ease. As such data or data points are very critical for problem analysis and sets the right direction in our aim at resolving problems. With the advent of data analytics and data science there is a lot of focus on tools, techniques that can be used to overcome data discrepancies and inaccuracies.

This programme is designed exactly to overcome the odds in terms of data gathering, data organizing, data visualization, data manipulation and data visualization apart from data analysis using Minitab.

**The Workshop will cover**

1	Qualitative and Quantitative data	2	Statistical Techniques used in DMAIC approach
3	Data gathering and Data Organizing	4	Data Interpretation and Data Visualization
5	Minitab for comprehensive data analysis	6	Presenting results in Minitab

## How You Will Benefit?

**Learn the right data analysis technique for solving various business problems**

**Extract the most meaningful results from large and small data sets and multiple data types**

**Improve your business efficiency and effectiveness**

**Use advanced analysis functions in Minitab**

## Who Should Attend?

Participants should be Lean Six Sigma Green Belt and Black Belt Certified

## Pre-Requisites

Participants should have installed the Minitab R18 version and MS-Excel (Windows 10) in their laptops for ease of use and clear understanding

## Fee

CII Member: INR 20,000 + GST  
Non Member: INR 22,000 + GST  
Please note: Pre registration with payment is a must
